## ABOUT ME

Aspiring Software engineering with strong frontend development skills and a growing passion for full-stack development. Experienced in building responsive, user-friendly web interfaces using HTML, CSS, JavaScript, and React. Currently learning backend development with Laravel and MySQL. Proficient in modern development tools including VS Code, Git/GitHub, and Figma. Highly motivated, quick learner, and eager to contribute to real-world software projects.

## Skills

|                   |                                              |
|-------------------|----------------------------------------------|
| Frontend          | HTML5 , CSS , JS , React                     |
| Backend           | Laravel , mern stack, API , Python           |
| Database          | MySQL ,mongodb                               |
| Tool and Software | VS code , Git , XAMPP , Figma (UI/UX Design) |

## Educational Background

**Bachelor - BSc (Hons) in information Technology Specializing in information Technology**

SLIIT - ( Reading)

**HND in Human Resources Management**

LPEC campus - (2024-2025)

**NVQ 4 - Information Technology**

VTA - 2022

# PROJECTS

## Coconut Plantation Management System

- Built CRUD operations using Laravel and MySQL
- Implemented authentication and data management features
- Focused on backend logic and database integration

## Finance Tracker Mobile App

- Developed Android app using Kotlin
- Implemented dashboard with income, expense, and balance summaries
- Applied clean UI principles for better user experience

## E-Shopping Web Application

- Designed responsive user interfaces using HTML, CSS, and JavaScript
- Implemented product listings, cart functionality, and checkout flow
- Created use case and sequence diagrams for payment processing

## Note Sharing System

- Developed a web-based note sharing platform for students to upload, download, and manage study materials.
- Implemented features such as user authentication, file uploads, search functionality, and category-based note organization.
- Used modern web technologies to create a responsive and user-friendly interface.

## Booking Management System

- Designed and developed an online booking system to manage reservations and customer bookings efficiently.
- Implemented booking confirmation, availability checking, and user management features.
- Focused on improving user experience with a clean and responsive design.

## **Certification**

- Python Program - UOM (Reading)
- Solo Learning HTML Program
- Solo Learning CSS Program
- Solo Learning SQL Intermediate
- Solo Learning JS Program
- Solo Learning SQL Program
- Frontend Developer program (UOM) (Reading)
- Front End Development Libraries Program (Reading)
- AI / ML Program - SLIIT (Reading)

## **SOFT SKILLS**

- Problem-solving & logical thinking
- Time management
- Team collaboration
- Willingness to learn new technologies
- Attention to detail

## **MEMBERSHIP**

LEO Club of SLIIT (September 2024 to Present)
